Microbiome Gut Brain Axis (MGBA) and its role in Health & Disease

Velammal Medical College Hospital and Research Institute

Madurai

18.10.21

CIRCULAR

Department of Physiology is organizing a value-added course on 'Gut brain axis' on 22nd and 23rd October, 2021 in association with Department of Gastroenterology.

Target audience are first year M.B.B.S. students of 2021 – 2022 batch.

Time – 08.00 am to 05.00 pm

The inauguration of this value-added course will be held at college MEU room on 22nd October 2021 at 08.00 am.

Kindly grace the occasion.

VELAMMAL MEDICAL COLLEGE

HOSPITAL AND RESEARCH INSTITUTE

MADURAI - 625009

Topic Name: Microbiome Gut Brain Axis (MGBA) and its role in Health & Disease

Introduction: Understanding of the gut-brain axis is important in learning the normal physiology of the gastrointestinal system and its association with the nervous system. This will help us understand the pathologies associated with the gastrointestinal system better. Also, the physiological importance of maintaining a normal gut-brain axis can also be insisted.

Objective: To educate the medical students about the gut brain axis.

Date: 22 and 23rd October 2021

Course Duration: 16 hours of duration (2 days)

Location: Department of Physiology, Velammal Medical College Hospital and Research Institute, Madurai

Organized by: Department of Physiology

Audience: first year MBBS students

Speaker: Faculties of Physiology, Microbiology, Gastroenterology

Method adopted: Lecture

Materials used: Lecture hand-outs

	4.30-5 pm	Feedback and Valediction	

Description: Department of Physiology, Velammal Medical College Hospital and Research Institute, Madurai, Tamilnadu in association with Department of Gastroenterology had organised a certifiable value-added course to First Professional MBBS students (2021-22 batch) on 22 and 23rd October 2021.

The program spanned for 16 hours of duration covering the importance of Microbiome Gut Brain Axis (MGBA) and its role in Health & Disease. The program began with inauguration and the faculty from both the departments gave talks on the concept of gut microbiota and their role in biochemical signalling between GIT and CNS. The clinical importance apart from what they have learnt in their regular curriculum are taught. In the afternoon session of the first day, the relationship of stress with gut brain axis was enlighten.

In the second day, after the recap, GBA and its effects on other system was discussed. Following which Dr.A.C.Arun , consultant gastroenterologist gave a brief lecture on gut brain axis disorders and their clinical importance and how to diagnose and treat a patient with gut brain disorders.

VELAMMAL MEDICAL COLLEGE

HOSPITAL AND RESEARCH INSTITUTE

MADURAI - 625009

At the end of the second day of the course, gut hygiene practices were discussed to improve the knowledge of the students.

The faculties from the department of Physiology took sessions about GI motility and gastrointestinal secretions on day one. This was followed by a session about gastrointestinal microbes and the effects of stress on those microbes by the faculties from the department of Biochemistry. On day two the faculties from the department of gastroenterology talked about the gut-brain axis and the disorders associated with it. This was followed by sessions about the usage of prebiotics and probiotics as well as gut hygiene practices.

Outcome Analysis: A post-test session was conducted at the end of day two. This was followed by a feedback session.

VELAMMAL MEDICAL COLLEGE

HOSPITAL AND RESEARCH INSTITUTE

MADURAI - 625009

Introduction

This is a fundamental course that is designed to develop basic computing skills in the students of Medical Sciences. The course guides you to use your computer system and the internet in a secure and effective manner. This certificate course primarily focuses on practical approach rather than theoretical one, and is designed for absolute beginners with little or no prior knowledge of computer systems.

Course date: 08.04.2022 and 09.04.2022

Course duration: 2days

Venue: Lecture Hall, First Floor.

Course fees: Free

Course schedule

DAY 1 08.04.2022		
Time	Topic	Recourse Person
8:00 – 9:00 am	Registration / Enrollment	
9:00 – 10:00 am	Introduction	Dr. Yoganandha Prof & Hod, Dental Department
10:00-11:00 am	Role Of Computers in Medical Education	Dr Shri Manikandan Associate Prof, Dental Department
11:00- 12:00 am	Pre-Medical and Medical School Requirements	Dr Divagar Associate Prof, Dental Department
12:00 – 1:00 pm	Digital Necessity During Residency and CME	Dr. Yoganandha Prof & Hod, Dental Department

Activity Report

Topic Name : Conventional Radiography

Introduction: Mrs. Padmavathy (RSO)

Objective: Physics, Techniques, position, Pit Falls & Interpretation.

Date: 17.08.2021 & 18.08.2021

Course Duration: 8+8 Hours

Location: Meeting Hall, Department of Radiodiagnosis.

Organized by: Department of Radiodiagnosis

Audience: Radio Diagnosis Post Graduates & B.Sc Radiology & Imaging Technology Students

Speaker: Dr. Sinduja

Method adopted: Power point presentation – Seminar.

Materials used: Projector & Laptop

Course time table:

Date	Time	Topic	Speaker
17.08.2021	8.45 am to 5.45 pm	Conventional Radiography	Dr. Rajalakshmi Preethi
18.08.2021	8.45 am to 5.45 pm	Conventional Radiography	Dr. Sinduja

Description:

The program started with introduction speech about the CME regarding conventional radiology by Dr. SARAH 2nd year Post graduate Student. The program was inaugurated by our DEAN DR. T. THIRUNAVUKKARASU. The welcome speech to the dignitary and students was delivered by Head of the Department of Radio-diagnosis DR. MARIAPPAN.

The First lecture was started by L. PADMAVATHI, RSO regarding X-RAY PRODUCTION AND ITS CHARACTERISTICS, X-RAY GENERATOR. The second lecture was given by DR. SINDUJA. She has started the lecture with CHEST X-RAY – VIEWS & ANATOMY. She has spoken about various methods & techniques used in Chest X-ray imaging. The third lecture was again given by DR. YOGARAJ and spoke about X-RAY PELVIS & HIP JOINTS- VIEWS & NORMAL ANATOMY.

On second day the first lecture was given by L. PADMAVATHI, RSO and spoke about RADIATION MONITORING INSTRUMENTS & RADIATION SAFETY. The second lecture was

Madurai

To,

The Dean,
VMCH & RI,
Madurai.

Respected sir,

Since we are planning to conduct value added courses on **"Problem solving methodology and decision making"** from the Department of Ophthalmology on 19th August 2021 from 9.00 AM TO 5.00 PM in lecture hall, I kindly request you to grant permission to conduct the same.

Thanking you,

Yours respectfully,

Copy to,

CIRCULAR

Department of Physiology is organising a Value added course on 7 and 8th of August, 2021 on Basic Life Support in association with Department of Critical care medicine.

Target audience are First year MBBS students 2020-21 batch

Time: 8 am to 5 pm

The inauguration of this value added course will be held at College MEU Room on 7/8/21 8am.

Kindly grace the occasion.

Topic Name: Basic Life Support

Introduction: Basic life support course is an essential course to all the people who are present in life saving situations like doctors, nurses, paramedical staff etc. Hence it is important to impart adequate knowledge about the basic life support methods and their procedures along with their difficulties for the M.B.B.S. students.

Objective: To improve the knowledge of the medical students in the basic life support methods and their procedures.

Date: 7 and 8th August 2021

Course Duration: 16 hours of duration (2 days)

Location: Department of Physiology, Velammal Medical College Hospital and Research Institute, Madurai

Organized by: Department of Physiology

Audience: first year MBBS students

Speaker: Faculties of Physiology, critical care medicine

Method adopted: Lecture, videos, role play

Materials used: BLS and ACLS demonstration and practice sessions on mannequins, Lecture hand-outs

	9 - 10 am	Defibrillator	Dr.S.Vijay Anand HOD Department of Critical Care Medicine
	10 - 11 am	Basics of ECG and ACS - theory	Dr.T.Suthan Thomas Assistant Professor Department of Critical Care Medicine
	11 - 1 pm	ACLS demo, role-play, videos	Dr.S.Vijay Anand HOD Department of Critical Care Medicine
	1 - 2 pm	Lunch break	
	2-5 pm	Group practice and Hands-on on ACLS	Dr.S.Vijay Anand HOD Department of Critical Care Medicine
	5 pm	Post test	Dr.M.Saravanan Associate Professor Department of Physiology

Description: Department of Physiology, Velammal Medical College Hospital and Research Institute, Madurai, Tamilnadu in association with Department of Critical care medicine had organised a certifiable value-added course to First Professional MBBS students (2021-22 batch) on 7 and 8th August 2021.

The program spanned for 16 hours of duration covering the salient aspects and importance of Basic life support. The program began with a pretest and faculty from both the departments gave talks on the concept of Basic life support and their clinical importance apart from what they have learnt in their regular curriculum and practical sessions. In the afternoon session of the first day, the event began with a roleplay by Dr.Vijay anand and his nursing team on correct and incorrect way of doing CPR.

VELAMMAL MEDICAL COLLEGE

HOSPITAL AND RESEARCH INSTITUTE

MADURAI - 625009

It was ensured that each student performed BLS on mannequins by himself and steps by them were corrected by the resource persons.

In the second day, after the recap and defibrillator introduction, basics of ECG and ACS was discussed. ACLS demo was given with roleplay and videos. In the afternoon session, it was ensured that each students performed ACLS on mannequins by themselves and steps by them were corrected by the resource persons.

At the end of the second day of the course, Post-test was conducted to assess the improvement in the knowledge of the students. Students, after the completion of the course were able handle the situation when BLS is needed

Faculties from the department of Physiology and critical care medicine took classes about the physiological basis of basic life support and the structural anatomy of the airways. This was followed by a session about the pathologies in the airways on day one. Day two was started with a recap from the day one. Then a session about the usage of defibrillator in life support and basics of ECG was taken. Then a session on the practicalities of basic life support was demonstrated by the faculties of the critical care medicine.

Outcome Analysis: a post-test session was conducted. This was followed by a feedback session.

MADURAI - 625009

BLS- Pre & Post test questions

- 1. A patient with possible STEMI has ongoing chest discomfort. What is a contraindication to nitrate administration**
 - a. Anterior wall myocardial infarction
 - b. Heart rate less than 90/min
 - c. Systolic blood pressure greater than 180mm hg
 - d. Use of phosphodiesterase inhibitor within the previous 24 hours**
- 2. A patient with sinus bradycardia and a heart rate of 42/min has diaphoresis and a blood pressure of 80/60 mm hg. What is the initial dose of atropine**
 - a. 0.1 mg
 - b. 0.5 mg
 - c. 1 mg**
 - d. 3 mg
- 3. Which intervention is most appropriate for the treatment of patient in asystole**
 - a. Atropine
 - b. Defibrillation
 - c. Epinephrine**
 - d. Transcutaneous pacing
- 4. A patient is in cardiac arrest. Ventricular fibrillation has been refractory to an initial shock. If no pathway for medication administration is in place, which method is preferred**
 - a. Central line
 - b. Endo tracheal tube
 - c. External jugular vein
 - d. IV or IO**
- 5. In which situation does bradycardia require treatment**
 - a. 12 lead ECG showing a normal sinus rhythm
 - b. Hypotension**
 - c. Diastolic blood pressure greater than 90 mm Hg
 - d. Systolic blood pressure greater than 100 mm Hg

MADURAI - 625009

6. You arrive on the scene with the code team. High quality CPR is in progress. An AED has previously advised "no shock indicated". A rhythm check now finds asystole. After resuming high quality compressions, which action due u take next
- Call for pulse check
 - Establish IV or IO access**
 - Insert a laryngeal airway
 - Perform endotracheal intubation
7. What is the indication for the use of magnesium in cardiac arrest
- Ventricular tachycardia associated with a normal QT interval
 - Shock refractory monomorphic ventricular tachycardia
 - Pulseless ventricular tachycardia – associated torsades de pointes**
 - Shock refractory ventricular fibrillation
8. How often should you switch chest compressors to avoid fatigue
- About every 2 minutes**
 - About every 3 minutes
 - About every 4 minutes
 - About every 5 minutes
9. What is the maximum interval for pausing chest compressions
- 10 seconds**
 - 15 seconds
 - 20 seconds
 - 25 seconds
10. What is the recommended depth of chest compression for an adult victim
- At least 1.5 inches
 - At least 2 inches**
 - At least 2.5 inches
 - At least 3 inches

MADURAI - 625009

11. What is the recommended compression rate for high quality CPR

- a. 50 – 60 compressions per minute
- b. 70 – 80 compressions per minute
- c. 90 – 100 compressions per minute
- d. 100 – 120 compressions per minute

12. How does complete chest recoil contribute to effective CPR

- a. Allows maximum blood return to the heart
- b. Reduces rescuer fatigue
- c. Reduces the risk of rib fractures
- d. Increases the rate of chest compressions

Activity Report

Management of Alcohol Use Disorders

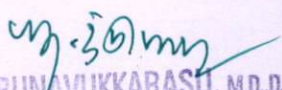

Introduction:

Alcohol use disorders are amongst the leading causes of mortality and morbidity in our population. Recent studies show that more than 5.7 crore Indians are affected by harmful/ dependence pattern use of alcohol.

Moreover, alcohol use disorders are associated with a number of physical complications including Liver disorders, Gastro-intestinal disorders, Central nervous system disorders and peripheral neuropathy. The mental health morbidity associated with alcohol use disorders is also high, with a significant number of problematic alcohol users having co-morbid depression/ psychosis/ anxiety and suicidality. The economic and social fall out of alcohol use disorders is also notable, namely – marital discord, domestic violence and loss of economic productivity. Given the magnitude of health and socio-economic problems associated with Alcohol use, awareness about the management of these disorders is paramount amongst young medical professionals.

Objective:

1. The course aims at creating awareness among the medical students about the burden, course and complications and management of alcohol use disorders.
2. At the end of the course the students are able to possess knowledge regarding the management of alcohol use disorders.

Certificate Distribution

Description: The value added course on Alcohol Use Disorders acts as an eye opener for creating awareness among the students. By integrating the Departments outside Psychiatry will help the students understand the impact of the problem on the community and the varied symptom presentation of this globally disabling condition.

Outcome Analysis : At the end of this session students will have better understanding on the presentation/course/ outcome and management of Alcohol Use Disorders. The outcome is subjectively assessed by feedback questionnaire rated by the students and pre-test and post test questions.

Question

1. Hand rub not indicated in the following condition

PRETEST SCORES

Hand rub not indicated in the following condition
93 / 134 correct responses

POST

TEST

SCORES

Hand rub not indicated in the following condition
112 / 136 correct responses

VELAMMAL MEDICAL COLLEGE

HOSPITAL AND RESEARCH INSTITUTE

MADURAI - 625009

2. Hand rub should be performed for a period of minimum

PRETEST

Hand rub should be performed for a period of minimum

16 / 135 correct responses

POST TEST

Hand rub should be performed for a period of

22 / 136 correct responses

VELAMMAL MEDICAL COLLEGE

HOSPITAL AND RESEARCH INSTITUTE

MADURAI - 625009

3. All are risk factors for CAUTI except

PRETEST

All are risk factors for CAUTI except

63 / 135 correct responses

POST TEST

All are risk factors for CAUTI except

117 / 136 correct responses

VELAMMAL MEDICAL COLLEGE

HOSPITAL AND RESEARCH INSTITUTE

MADURAI - 625009

4. Majority of VAP is caused by PRETEST

Majority of VAP is caused by

52 / 132 correct responses

POST TEST

Majority of VAP is caused by

51 / 137 correct responses

5. Large blood spillage should be disinfected with PRETEST

Large blood spillage should be disinfected with

88 / 135 correct responses

VELAMMAL MEDICAL COLLEGE

HOSPITAL AND RESEARCH INSTITUTE

MADURAI - 625009

POST TEST

Large blood spillage should be disinfected with
103 / 137 correct responses

6. For device associated infection the device should be in place for at least PRETEST

For device associated infection the device should be in place for atleast
52 / 135 correct responses

VELAMMAL MEDICAL COLLEGE

HOSPITAL AND RESEARCH INSTITUTE

MADURAI - 625009

POSTTEST

For device associated infection the device should be in place for atleast

101 / 137 correct responses

7. According to NHSN surveillance diagnostic criteria of ventilator associated events, infection related ventilator associated complications belongs to PRETEST

According to NHSN surveillance diagnostic criteria of ventilator associated events, infection related ventilator associated complications belongs to

42 / 133 correct responses

VELAMMAL MEDICAL COLLEGE

HOSPITAL AND RESEARCH INSTITUTE

MADURAI - 625009

POST TEST

According to NHSN surveillance diagnostic criteria of ventilator associated events, infection related ventilator associated complications belongs to

49 / 135 correct responses

8. HAI Surveillance does not include

PRETEST

HAI Surveillance does not include

68 / 134 correct responses

VELAMMAL MEDICAL COLLEGE

HOSPITAL AND RESEARCH INSTITUTE

MADURAI - 625009

POST TEST

HAI Surveillance does not include
129 / 137 correct responses

9. Surgical anti-microbial prophylaxis must be provided for all except

PRETEST

Surgical anti microbial prophylaxis must be provided for all except
87 / 135 correct responses

POST TEST

HAI Surveillance does not include
129 / 137 correct responses

VELAMMAL MEDICAL COLLEGE

HOSPITAL AND RESEARCH INSTITUTE

MADURAI - 625009

10.SSI is the infection develops at the surgical site within

PRETEST

SSI is the infection develops at the surgical site within
33 / 135 correct responses

POST TEST

SSI is the infection develops at the surgical site within
86 / 137 correct responses

VELAMMAL MEDICAL COLLEGE
HOSPITAL AND RESEARCH INSTITUTE
