Department of Community Medicine

Report of Family Adoption Program

As part of the curriculum for first MBBS students, NMC has introduced the family adoption program. On the first month of first year of MBBS, 2021-22 batch students were taken by community medicine department for family adoption program. Each student is supposed to adopt 5 families and keep following their health & wellness over the period of MBBS course. The families will also have a direct link to a medical college & will have someone is approachable & who can explain things to them in easily understandable manner.

The place chosen was Sakkimangalam village & the nearby Samathuvapuram attached to the village. After a session on why & how the family adoption program works, the students visited these two localities on Saturdays of 2 consecutive weeks i.e. **23-4-2022 & 30-4-2022** from 9 AM to 1 PM. 150 students from the 2021-22 batch attended the program & visited the village. The students were accompanied by faculty members & postgraduates. The survey consisted of personal details like name, age, gender, number of family members, head of family and the occupation of each family member. It also had questions about income of family and how the income is split between food, electricity, water and other bills. To check on the adequate space required for a person to live questions like area of house, number of rooms, doors and windows were asked. Questions on personal hygiene practices were also asked. In case of married couple and/or with children, they were asked about sexual health and child rearing practices. The family members were also asked about diseases like tuberculosis, diabetes, hypertension, heart disease, cataract, etc to check their knowledge about the disease spread and its effect on body. To check their social
