Report for Will-O- Wit

An Orientation programme was conducted by the newly formed Velammal Medical College Alumni Association for giving an insight into NEET-PG. It also marked the first grand event by the alumni association of the college. The aim was to give tips and tricks about the exam and the preparation strategies involved. The welcome address was given by the president of the alumni association Dr. Maria Vidhyan Fernando. He spoke on the formation of the association and the aims that it wishes to achieve. The honorary address was given by Dr. R.M Raja Muthiah, Dean of VMCH&RI. He spoke on the importance of the alumni association and how a strong alumni association is essential in networking and aiding one's career graph. The Speakers were introduced by Dr. Ramesh, professor of General Medicine. The speakers were Dr. Saran Lal (MD anaesthesia, AIIMS Delhi), Dr. Abishek (MD paediatrics, JIPMER) and Dr. Aruna (MD General Medicine). Each one had spoken about their pg preparation, its intricacies, strategies involved, the counselling process and lastly the stark difference in the lives of a PG student and an undergraduate/ intern. A Q&A session was hosted by Mr. S. Ajay Sreevatsav, student coordinator 2nd year MBBS, VMCH&RI and all the queries asked by the students were answered in a clear manner. The vote of thanks was given by Dr. C. Prathap, Executive secretary of the Alumni Association and the session was concluded.

“WILL O WIT”

A PG PREP EXPOSE

Report: Will o wit is an online webinar conducted on the fifth of September 2020 by the department of physiology, Velammal Medical college hospital and research institute, Madurai, organised by Velammal Medical College Alumni Association. The webinar was held on the topic of PG preparation, where in, esteemed guest speakers were asked to enlighten medical undergraduates about the nuances of preparing oneself to tackle the post graduate examination. The purpose of the webinar was to educate undergraduate medicos on the various techniques and tactics to crack Neet pg exam and to also rid them of their fears and doubts. The guest speakers were eminent doctors(Alumni) with post-graduation from reputed and esteemed medical universities. They volunteered to take time off their busy schedule to elaborate and share their personal experiences, the highs and lows, the difficulties they went through and the hard work they put in to ace the exams with flying colours. The event started at around 5 pm which was presided over by almost 67 attendees, all of them being from the final year, along with our esteemed dean Dr.Rajamuthiah, our medical superintendent Dr.Thirunavukkarasu sir, the HOD of physiology Dr.Anu ma'am and the members of the velammal alumni association. session started off with the welcome speech by Dr. Ramesh sir, which was followed by the introduction of the speakers which was done by Dr.Maria Vidhyan. Then, the Alumni speakers: Dr. Abishek, Dr. Aruna and Dr. Saran lal respectively, took turns to share their personalised experiences during the course of preparation for their PG exam. It gave the attendees an insight into their strategies, tactics, references, and a lot more ideas which laid a foundation as to what the possibilities are and what we can make of them. It was really intriguing to listen to each individual speaker as they brought about a variety of scenarios and

experiences which they faced, with major contrasting features to one another. This was followed by a doubt clearing session, which was conducted by S.Ajay Sreevatsav, a student of the second year. The doubts from the student's side were complied and presented to the speakers one by one, where they took turns to answer each individuals doubt with clarity and precision. The doubt clearing session proved fruitful as many meaningful doubts were asked and cleared. Some attendees asked questions spontaneously during the webinar, via the chat box which was further cleared at this session. No doubts were left unanswered. The session concluded with a thank you note from Prasanna venkateshan, a final year student. A feedback form was given for the attendees to fill which got an overwhelming response. The attendees, via their responses, reported that the session was an overall success and a very interactive one, where in most of their doubts were cleared and they found their fears and misconceptions surrounding the pg exam a little less worrisky. Some also commented that the 2 webinar was a little too formal and that it could've been a little less monotonous, but overall, the webinar went ahead with no setbacks and had a very good response from the attendees, who also wished to attend such webinars in the future.

Report

Career Guidance Programme Hosted by Alumni of VMCH&RI

On 12.07.2022 a career guidance programme was hosted by the Alumni Association of Velammal Medical College. The aim was to give the Interns of VMCH&RI an idea of the career options available currently. The welcome address was given by Dr. Thirunavukkarasu, Dean VMCH&RI. He had talked about how he went about choosing careers when he was an intern, and how the options presented to medical graduates in his time were fewer when compared to what is being offered currently. Dr. Subramaniam, Rheumatologist had given his insight on his experience abroad and how he tackled it. He introduced the speakers, Dr Sai Yuvavishalini, who is currently on her way to the UK to continue her PLAB journey; Dr. Madhan who has successfully entered the administrative services and is currently under training; Dr. Dhivya, final year postgraduate in Anaesthesia in VMCH&RI and Dr. Shivani, Junior doctor working in the NHS in UK. Each speaker had a different perspective on career pathways. Dr Sai Yuvavishalini had spoken about the PLAB process and the selection criteria, she'd explained on her pursuits during her UG period and how it helped build her resume as a candidate. Dr Shivani, who is currently a junior doctor in the UK, had explained on the process of PLAB, and the order of exams given to reach the level of a superspecialist. She'd also mentioned about the vast difference in attitude towards patient care, work culture and wages between UK and India. Dr. Madhan had spoken about the alternative career pathways that is being offered, ranging from insurance, foreign aid organizations, journalism and civil services. Lastly, Dr Dhivya had given a talk on research and how she went about paper presentations and how it would aid her in the future. The vote of thanks was presented by Dr. Swarnavalli, CRRI, and the session was concluded.

3pm- Introduction and Welcome	: Dr N Subramanian, MD, MRCP, FRCP, Rheumatologist
305pm- Deans Address	: Dr Thirunavukkarasu, Dean VMCH
310pm- Whats beyond MBBS	: Dr N Subramanian, MD, MRCP, FRCP,
320pm- Career abroad- first hand info	: Dr Yuva Vishalini, GMC registered in UK
330pm- Working in NHS UK	: Dr Shivani, Core trainee Surgery, NewCastle, UK
340 pm Civil Services	: Dr Madhan IPS (training) (Velammal Alumni)
355pm-PG and Research	: Dr Dhivya, MD (Anas PG, VMCH)
405pm- NEET exam guidance	: Dr Seran Reddy, MD (Anas/Critical care) Hyderabad.
420pm- QA-	All Panelists
Concluding Remarks	: Dr Subramanian
Vote of thanks	: Dr Swarnavalli CRRi

Thank you

Dr N Subramanian, Rheumatologist, VMCH

Introduction to the speakers

Dr. Yuva Vishalini

1. A GMC registered practitioner in the UK
2. An alumna of Velammal medical college hospital and research institute, Madurai.

Introduction to the speakers

Dr. Shivani B Kuttuva

1. Core trainee- Surgery, New Castle, UK.
2. An alumna of Velammal medical college hospital and research institute, Madurai.

Introduction to the speakers

Dr. Madhan

1. IPS training
2. An alumnus of Velammal medical college hospital and research institute, Madurai.

Introduction to the speakers

Dr. Dhivya

1. Final year post graduate in Anaesthesiology
2. And an alumnus of Velammal medical college hospital and research institute, Madurai.

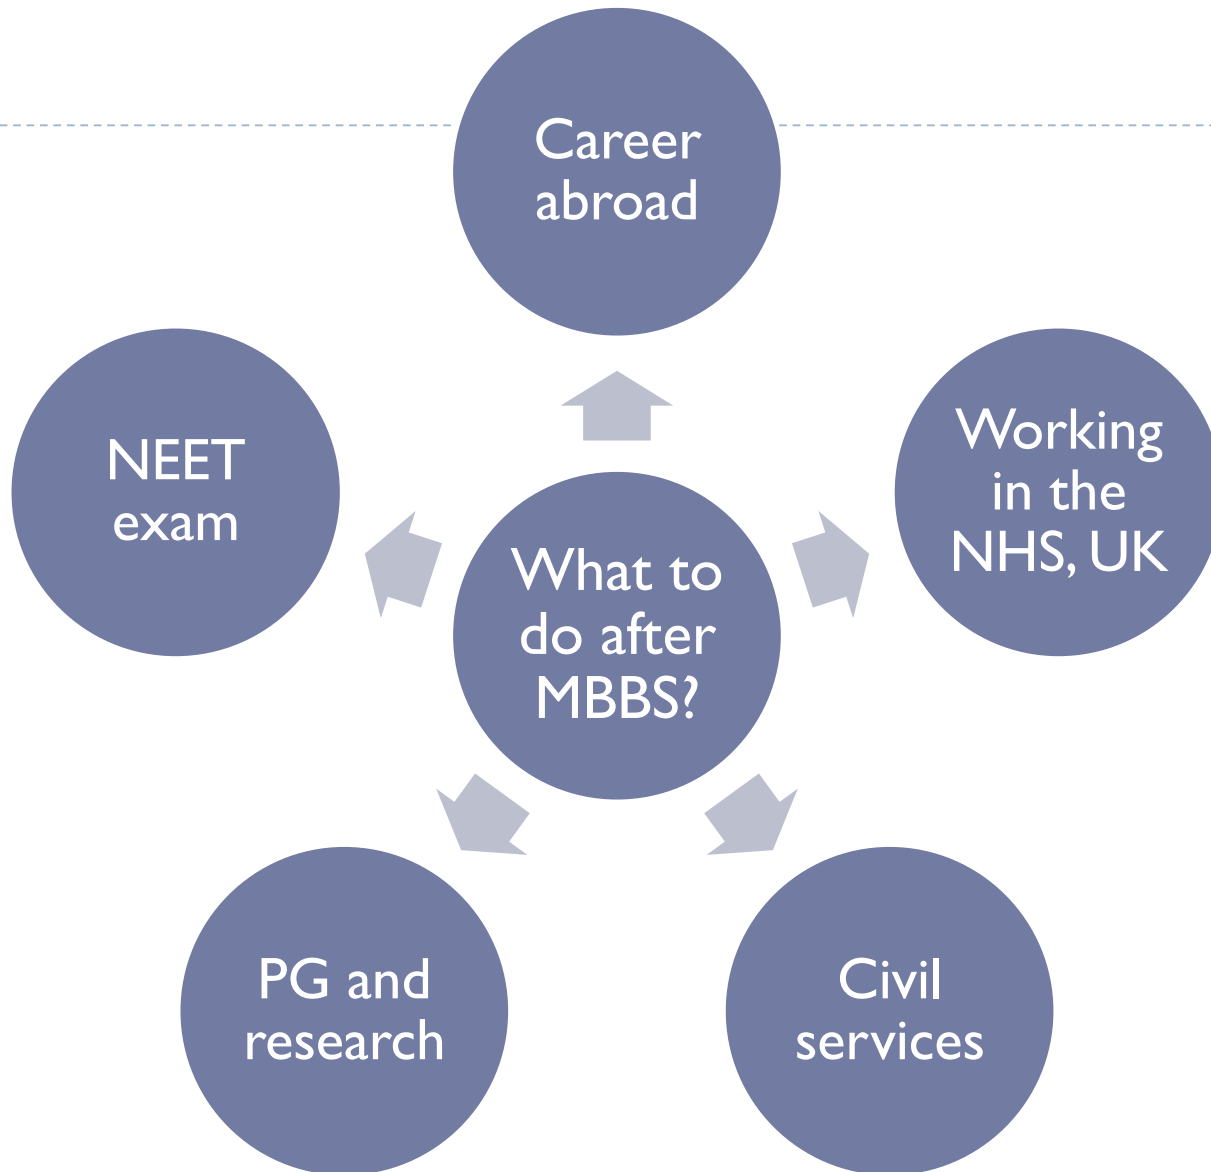

Introduction to the speakers

Dr. Seran Reddy

1. MD (Anaesthesia and critical care)
2. Practicing in Hyderabad

The **S-P-I-K-E-S** Protocol

S Setting Up the Conversation

P Perception

I Invitation

K Knowledge

E Emotions

S Strategy and Summary

S – SETTING - Secure an appropriate area for the discussion.

- Have the conversation in a quiet undisturbed area.
- Prepare for what to say and anticipate the patient/family reaction.
- Have the key people (whom the patient wants) in the room.
- Seat the patient closest to you and have no barriers between you.
- Sit down, try to be calm, make eye contact.

P – PERCEPTION - Assess the patient's understanding of the seriousness of their condition.

- Ask what the patient and family already know.
 - “Tell me what you understand about your condition so far.”*
 - “What did the other doctors tell you?”*
 - “I’d like to be sure we are on the same page with understanding your condition, so can you tell me...”*
- Assess the patient and family members’ level of understanding.
- Take note of discrepancies in the patient’s understanding and what is actually true.
- Watch for signs of denial.

I – INVITATION - Get permission to have the discussion. ***“ASK BEFORE YOU TELL.”***

- Set goals for the discussion - ask the patient if they want to know the details of the medical condition/treatment.
“I’d like to go over the results, would that be ok?”
“Today my plan is to discuss...is that okay?”
- Accept the patient’s right not to know.
- Offer to answer any questions the patient/family member may have.

K – KNOWLEDGE - Explaining the facts

- **Avoid** medical jargon by explaining the facts in a manner that the patient will understand.
NOT: *“You have a nuclear grade 1ER/PR positive spiculated 4-centimeter lesion.”*
BETTER: *“You have a fairly good sized tumor in your breast.”*
- Fill in any gaps that were evident in the “Perception” stage.
- Present the information in small chunks.
- After each chunk, verify the patient’s understanding.
“Are you with me so far?”

E – EMOTIONS - The Empathic Response – Be Supportive

- Deal with emotions as they occur
(patients who are very emotional will not comprehend what you say).
- Use open-ended and direct questions to explore what the patient is feeling.
“Can you tell me more about how you feel?”
“Did that make you angry?”
- Respond to emotions with empathic and affirming statements.
“I can see you weren’t expecting this.”
“Most people would be upset finding this out.”
- Use *“tell me more”* statements.
PT: *“I don’t know how I’m going to tell my kids.”*
MD: *“Tell me more about that.”*
- Try to keep your own emotions from taking over.
- **AVOID** responding with false reassurance such as:
“Everything will be fine.”
“I’ve seen lots of miracles happen.”

Note: You don’t have to have the same feelings as the patient
nor do you have to agree with the patient.

S – STRATEGY & SUMMARY - Closing the interview

Strategy

- Decide what the best medical plan would be for the patient.
- Appraise in your mind or clarify with the patient their expectations of treatment and outcome.
- Recommend a strategy on how to proceed.
- Collaborate and agree on the plan.
- Ask the patient to repeat to you their understanding of the plan.
- Have a clear treatment plan in writing for the patient to take home with them.

Summary

- Summarize the conversation.
- Offer to answer questions. (be prepared for tough questions):
 - PT: *"Does this mean I'm going to die?"*
 - MD: *"Tell me more about what concerns you?"*
 - PT: *"Can I be cured?"*
 - MD: *"I'm sorry to say that it is unlikely. Our goal is to keep it in check."*
 - PT: *"How long do I have to live?"*
 - MD: *"I can discuss that with you, but first tell me why you ask?"*

CLASS PROTOCOL

- BY DR.MUNEESWARAN

The **C-L-A-S-S** Protocol

The C-L-A-S-S Protocol

Five Key Steps for Clinical Interviews

C - CONTEXT	The physical set up of the area you choose for the interview
L - LISTENING SKILLS	How to be an effective listener
A – ACKNOWLEDGE	How to validate, explore and address emotions and concerns
S - STRATEGY	How to provide a management plan that the patient can understand
S - SUMMARY	How to summarize and clarify the conversation ensuring comprehension

C-Context (setting)

A private area with no distractions

Physical Space

- Choose an area where you can have a private conversation.
- Your eyes should be at the same level as the patient and/or family member (sit down if you need to).
- There should be no physical barriers between you.
- If you are behind a desk, have the patient and/or family members sit across the corner.
- Have a box of tissues available.

Family Members/Friends

- The patient should be seated closest to you.

Body Language

- Present a relaxed demeanor.
- Maintain eye contact except when the patient becomes upset.

Touch

- Only touch a non-threatening area (hand or forearm).
- Be aware of cultural issues that may not allow touching.

L - LISTENING SKILLS

Be an effective listener.

Open Ended Questions

- *“How did you manage with the new treatment?”*
- *“Can you tell me more about your concerns?”*
- *“How have you been feeling?”*

Facilitating

- Allow the patient to speak without interrupting them.
- Nod to let the patient know you are following them.
- Repeat a key word from the patient's last sentence in your first sentence.

Clarifying

- *“So, if I understand you correctly, you are saying...”*
- *“Tell me more about that.”*

Time & Interruptions

- If there are time constraints, let the patient know ahead of time.
- Pagers and phone calls – don't answer, but if you must, apologize to the patient before answering.
- Try to prepare the patient if you know you will be interrupted.

A -ACKNOWLEDGE EMOTIONS

Explore, identify, and respond to the emotion.

The Empathic Response

- Identify the emotion.
- Identify the cause of the emotion.
- Respond by showing you have made the connection between the emotion and the cause.
“That must have felt terrible when...”
“Most people would be upset about this.”
- You don't have to have the same feelings as the patient.
- You don't have to agree with the patient's feelings.

S -STRATEGY

Propose a plan that the patient will understand

The Plan

- Appraise in your mind or clarify with the patient their expectations of treatment and outcome.
- Decide what the best medical plan would be for the patient.
- Recommend a strategy on how to proceed.
- Evaluate the patient's response.
- Collaborate and agree on the plan.

S -SUMMARY

Closing the interview

Final Thoughts

- Summarize the discussion in a clear and concise manner.
- Check the patient's understanding.
- Ask if the patient has any other questions for you.
- If you don't have time for further questions, suggest that they can be addressed at the next appointment.
- Make a clear contract for a follow up visit.

CONES PROTOCOL

-

BY DR .RAVI RAGHUL

The **C-O-N-E-S** Protocol

The C-O-N-E-S Protocol

When You Have to Tell

C Context

O Opening Shot

N Narrative

E Emotions

S Strategy & Summary

Use the C-O-N-E-S Protocol when:

- Disclosing that a medical error has occurred
- There is a sudden deterioration in the patient's medical condition
- Talking to the family about a sudden death

NOTE: The news should be delivered by the most senior person on the patient's treatment team.

C – Context

- Prepare for what to say and anticipate the patient/family reaction.
- Have the conversation in a quiet undisturbed area.
- Seat the patient closest to you and have no barriers between you.
- Sit down, try to be calm, maintain eye contact.
- Have a box of tissues available.

O – Opening Shot

- Alert the patient/family member of important news.
 - “This is difficult. I have to tell you what I found out about why your mother is so ill.”*
 - “This is hard, but I have some information to give you that is important.”*
 - “I must talk to you about your condition.”*
 - “Thanks for coming in. I must tell you what is going on with your father.”*

N – Narrative Approach

- Explain the chronological sequence of events.

“As you know, your mother came in back in...”

“Then, we gave her... and there was little improvement.”

“Last night we....and I just found out that ...”

“In other words, she received too much chemotherapy.”

- Avoid assigning blame and/or making excuses.
- Emphasize that you are investigating how the error occurred.

“We started investigations and by the end of today I hope to be able to answer your questions as clearly as possible.”

“I hope by the end of today she will turn the corner and start improving.”

- Offer a clear apology.

“I am really sorry that this has happened.”

E – Emotions

- Address strong emotions with empathic responses.
- Use the E-V-E protocol as soon as strong emotion occurs.

“I know it’s upsetting for you and it’s awful for me too.”

"I know this is awful."

"It's very rare, but it does happen and I'm sorry to say that it did."

- Beware of being pushed into making promises you can't deliver.
- Avoid reassuring the person that there's going to be a good outcome or that no harm was done.

S – Strategy & Summary

- Summarize the discussion and make specific plans for follow up.
- Let them know the situation is a priority.

"I am the doctor responsible for your mother so it is important that I found out what happened."

"I'll be open and honest with you when I have all the facts."

"I can guarantee we will do our best."

"Here is what I propose we do."

"Let's meet at the end of today or I can call you when I know more."

- If you don't know the answer, say so and that you will attempt to find out.
- Disclosing medical errors is now a standard. It's not optional.
- Sensitive disclosures have a favorable impact on malpractice claims.

Guest Lecture-NEET

Presented by : Dr.A.S.Meenakshi Sundaram,
Assistant Professor, Dept. of Biochemistry, PSGISMR.
Date & time : 13.09.2022 2.00 pm to 4.00 pm
Topic : Understanding current trends in competitive examinations
Venue : Lecture Hall I, Velammal medical college.
Conducted by : Dept. of Physiology, Velammal medical college.

As per the hon'ble Chairman's instructions, a guest lecture was planned to be conducted by the department of Physiology, Velammal medical college on orienting the undergraduate students about the current trends in the competitive exams following completion of their undergraduate degree. Hence, guest speaker, Dr.A.S. Meenakshi Sundaram, Assistant Professor, Dept. of biochemistry, PSGISMR was invited to give a lecture. Some common questions, which needed clarification, were collected from students beforehand and were compiled.

The lecture was conducted in the lecture hall I, on 13.09.2022 from 2.00 pm to 4.00 pm. It was attended by 52 CRRI students from VMCH&RI. The welcome address was given by Dr.R.Ramesh, Professor, Dept of General Medicine. Introduction of the speaker was done by Dr.S.Anu, Professor and Head, Dept. of Physiology. The guest speaker conducted an inspiring, eloquent and interactive lecture about the current trends in competitive examinations. He spoke about the current environment in which the competitive exams are conducted, the ways by which questions are asked, the standards with which the questions are taken and how to face them. He also explained the students about the mentality with which they should face the examinations and the mental and physical hardships that might come along the way.
