CME on World TB Day – Commemoration

**Velammal Medical College Hospital & Research Institute
& Speciality Wing**

Invitation

Department of Respiratory Medicine Cordially invites you for the CME on

“WORLD TB DAY – COMMEMORATION”

We from Department of Respiratory Medicine VMCH Madurai in collaboration with Reach
AKSHYA TB CARE FOUNDATION are conducting CME on

Tuberculosis . Highlighting on recent updates in diagnosis and management of tuberculosis on
occasion of World TB day on 24/03/2017.

Topics:

1. Recent Updates in RNTCP : Dr. P. Premananth (DNB Pulmonary medicine)

Assistant Professor Dept. Of Respiratory Medicine

2. Standard of TB care in India: Dr. J Guru Karthik (MD Community Medicine)

Medical Consultant Reach Akshya TB Care

Venue: Third floor Auditorium Hospital building

Time: 02.00pm

Followed by High Tea

Welcome with Thanks

Report of World TB day commemoration

DEPARTMENT OF RESPIRATORY MEDICINE

Each year, we commemorate World Tuberculosis (TB) Day on March 24 to raise public awareness about the devastating health, social and economic consequences of TB, and to step up efforts to end the global TB epidemic.

THEME OF TB DAY 2017-UNITE TO END TB

2017 is the second year of a two-year "Unite to End TB" campaign for World TB Day. This year, WHO will place a special focus on uniting efforts to "Leave No One Behind", including actions to address stigma, discrimination, marginalization and overcome barriers to access care.

Under the leadership of honorable Chairman Mr. M.V. Muthuramalingam, Velammal Medical College and Hospital had organized CME program on 24.03.2017 at auditorium Velammal hospital, Madurai.

It was collaborative initiative with Reach AKSHYA TB CARE. Innogated by The Dean VMCH Madurai.

It was highlighted on recent diagnosis and management of tuberculosis elaborated by Dr. P.Premananth (AP Pulmonary medicine) & Guest Speaker Dr. Guru Karthik (MD Community medicine).

Students posted in respiratory medicine and final year students and faculties of all departments in Velammal medical college attended it.

Report

Department of Biochemistry, Velammal Medical College and Hospital, Madurai has organized a training and hands on program in "Basics of Microsoft excel". The program was organized in the Demo room, Department of Biochemistry on 25.10.2017 from 9am to 4pm. The following points were covered:

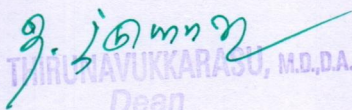

Getting started with excel by Dr. S.Sindhu, Assistant Professor, Pharmacology.

All about cells and Basic data entry by Mr.S.Madhan Pap, System analyst, IT department.

Launch buttons by Dr.M.Saravanan, Associate Professor, Physiology

Importing and using templates by Dr.A.Hariharan, Assistant Professor, Biochemistry.

Titles and Column Names by Dr.B.Sudharsan, Assistant Professor, Community Medicine

Research Methodology Workshop

Report

Date: 06.04.2018

Time: 8am to 4pm

The workshop on Research Methodology was started with a pre-test which was carried out by Department of Community Medicine. First session of the day was on Introduction to research methodology, which was handled by Dr. Deiveegan. He explained the importance of research and elaborated the main objectives of the Research Methodology Workshop were as follows:

- a. To familiarize participants with various research methods and techniques.
- b. To enhance participants' understanding of the research process from conceptualization to publication.
- c. To provide practical guidance on designing research studies and data collection methods.
- d. To enable participants to critically evaluate research studies and identify methodological strengths and limitations.
- e. To facilitate networking and knowledge sharing among researchers from different disciplines.

This was followed by another topic on "Research design and strategy", by Dr. Jayashree. She taught about formulating research questions, objectives and selecting appropriate research designs (quantitative, qualitative, mixed-methods).

Later Dr. Praveena dealt with the topic "Descriptive studies". She explained about the basic summary about the types of research design and went into his topic – case reports and case series. Starting from history to ending with the advantages and disadvantages of the case studies, she explained in depth and in an easily understandable way.

After a short tea break, Dr. Samir handled the subject on "Analytical studies". He explained about the types of analytical studies - case control studies and cohort studies. He emphasized the importance of analytical studies in finding the association between two study groups and in testing a hypothesis.

Anuppanadi, Madurai-625 009, T.N.

VELAMMAL MEDICAL COLLEGE HOSPITAL AND RESEARCH INSTITUTE MADURAI - 625009

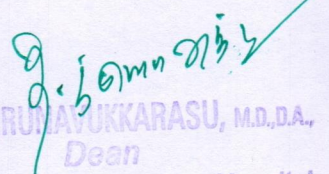

This was followed by "Randomized controlled trials", by Dr. Trupti Bodhare. In RCT, she explained about the basics about RCT, Blinding types and technique, advantages, and the difficulties in conducting a RCT. And a few words about quasi experimental studies were also explained.

After this session there was a lunch break for 1 hour. After lunch two sessions were continuously taken by Mr. Vijay Anto on "Sampling methods" and "Data collection and analysis". He explained about the different types of probability and non-probability sampling techniques with suitable examples and pictorial representation. Sample size calculation was dealt in brief for each study design.

Level of significance, power of study and different formula for sample size calculation was explained briefly with an example. Then he also provided participants with practical knowledge of different data collection methods and their application in various research contexts. Participants gained familiarity with statistical analysis techniques for quantitative data and qualitative analysis methods for textual or narrative data, enabling them to draw meaningful conclusions from their research findings.

After a short tea break Dr. Dhaval discusses about "Ethics in medical research". He emphasized the importance of ethical conduct in research, including obtaining informed consent, ensuring participant confidentiality, and addressing potential conflicts of interest.

After conducted the post-test, the workshop ended with vote of thanks.

The VMC shoulder conference was a two-day workshop about the latest modalities in surgical techniques for shoulder dislocation and shoulder injuries which also included arthroscopic demonstration. The conference was attended by Velammal faculties as well as other college faculties. Day one was dedicated to workshop and day two was dedicated to the CME program. Day one was divided into 3 sessions. First session started at 9.30 am and it included live demonstration of arthroscopic Bankart repair technique which was followed by three case discussions about shoulder dislocation and their management. The second session started after tea break and included discussions about shoulder cuff injuries and their management. This was followed by live arthroscopic rotator cuff repair surgery for about an hour. Session three started after lunch. The session was about rehabilitation after shoulder injuries. There was case discussion about shoulder injuries which was followed by MRI readings and their findings in cases of shoulder injuries. This was followed by live surgery demonstration of rotator cuff tear. After the demonstration the session continued with the rehabilitation programs and methods and cases of failed shoulder repair were discussed. The day ended with that session.

The second day was about the CME program. It has 3 sessions. The first session started with TSA and reverse TSA surgeries. This was followed by discussion about current trends in resurfacing arthroplasty. The second session was case based panel discussion for humerus fractures. This was followed by case-based discussion on arthritis and cuff arthroplasty. The third session was about complications of total and reverse shoulder replacement surgeries. This was followed by a panel discussion on failed shoulder cases. After the session the program ended with vote of thanks.

NATIONAL UNDERGRADUATE CONFERENCE IN NEUROLOGY & ENDOCRINOLOGY - APRIL 2018

The Department of Physiology and Department of Medicine conducted UGBeaCON 2018, a National Undergraduate Conference in Neurophysiology and endocrinology from 19.4.2018 to 21.4.2018 with Dr. Anu HOD of Physiology as the Organizing Secretary and Dr. Chandrasekar Prof and HOD of Medicine, Dr. Vadivel murugan Prof of Medicine, Dr. Angu vijayan Associate Prof of Medicine as Organizing Chairman for the conference. The conference was accredited with 30 credit points under The Tamil Nadu Dr. M.G.R. Medical University. It was attended by 26 colleges from all over Tamil Nadu and Puducherry.

On the first day of the conference three workshops were conducted. They were organized by Dr. Rekha from the Department of Physiology. Workshop on New diabetic gadgets was conducted by Dr. Vadivel Murugan and Dr. Sangeetha from the Medicine Department. The second workshop was conducted by Dr. Jeyashree from Community Medicine Department on Research Methodology. The third workshop was on CT and MRI of Brain conducted by Dr. Mariappan and Dr. Rajalakshmi Preethi from the Radiology Department. Accommodation for the visiting students and faculties, well appreciated by every student and faculty, was arranged in the Velammal Medical college hostel itself by Dr. John Rajpathy. Dr. Shanthi from the Physiology department who was the treasurer of the conference also took charge of the food and refreshments for all the three days.

The second day started with the inauguration of the conference. The function was graced by the Hon. Chairman Shri M.V.Muthuramalingam Sir, The Dean, The Medical Superintendent, Dr. Chandrasekar and other dignitaries from various fields. After the inauguration the academic sessions were underway. Dr. Mythili Bhaskaran, Ex. Dean of Stanley Medical College, gave a talk on "The Good Bad and the Ugly" which was followed by a talk by Dr. Vadivel Murugan on "Overview of Type II Diabetes". After a small break, Quiz on UG Neurophysiology and Psychiatry began. From a total of 18 teams, the top 5 teams were selected from a preliminary written exam and the final quiz was conducted. The Quiz master was Dr. J Keba from the Department of Physiology. UG Quiz was won by the team Salem Kumaramangalam Medical College followed by Mahatma Gandhi Medical College, Puducherry and Saveetha Medical College, Chennai.

In the afternoon debate prelims, case and paper presentations were organized. Debate prelims was conducted by Dr. Vallish from the Department of Pharmacology to select the final list of teams. Case presentation won by, Madras Medical College & Sree Balaji Medical College and paper presentation, won by Thirunelveli Medical College & Kilpauk Medical College was judged by faculties from the Department of Medicine and organized by Dr. Saravanan from the Department of Physiology.

The last day also started with lectures. Dr. T S Sivakumar, Neurologist in VMC specialty hospital" gave a lecture on "Neurology Old and New" and Dr. Subramanian, Rheumatologist in VMC, gave a speech about career guidance. Short films made by various colleges were screened during the break time. First place for short film contest was shared between Madurai Medical College and Melmaruvathur Adhiparasakthi Medical College. An honorary prize was given to Shreedhar Priyan (CRRI) of Velammal medical College for short film making.

After the lectures role play event started which was won by Coimbatore Medical College. The event was organized by Dr. Kaniethapriya from Department of Physiology. Off stage events like poetry writing, painting & model making were also conducted in the conference. The Off-stage events were organized

by the faculties of the physiology department. The last event of the conference was the debate, which was conducted by Dr. Vallish, was won by Chettinad Medical College. All the competitive events were conducted separately for Velammal students also and judged by faculties from other medical colleges. The following students from Velammal Medical College received first prize for various events, Dinesh (Final year) for model making, Vaira praveena (Second Year) for case presentation, Pooja Devi (Second year) for paper presentation. Feedback was received from the students as well as from the visiting faculty. The valedictory function was attended by the Dean of Velammal Medical College. Dr. Anu thanked the physiology and medicine department and the student volunteers for making the entire event a grand success.

A Workshop on Quality Assurance In Medical Education

Report

Date: 06-10-2017

Venue: Lecture Hall

Time: 8am-4pm

Program started with introduction and welcome address by Dr Samir Bele.

Dr. Trupti spoke about the context and change in Medical and highlighted some of the education barriers to change in medical education. She explained in detail what is quality and quality assurance mechanism.

Dr Samir explained in detail the coordination of Quality Assurance Process, importance of understanding of the various standards being used and adequate preparation and planning. He emphasised that an effective communication strategy. And everyone including Staff, students, trainees, and other stakeholders need to understand the rationale and significance of the quality assurance process including what is to take place and their contribution. He talked about accrediting teams should work cooperatively meeting agreed deadlines for written submissions.

Dr. Rajkishore emphasised that a range of instructional methods should be used to deliver the program which utilizes all three domains of learning (cognitive, psychomotor, and affective). There should be adequate opportunity for both horizontal and vertical integration of subject material. There should be a strong nexus demonstrated between the program's research and teaching. Adequacy of clinical contact in a variety of healthcare settings is an important consideration.

Dr John informed that as per the specific recommendation by the regulatory body, all the medical colleges are organising FDPs. He insisted that the quality assurance of such programs must be ensured and the outcomes of the same are evaluated as a follow-up activity. He suggested that the quality assurance of the FDP can be accessed via either the internal or external quality assurance methods.

Dr. Trupti Bodhare discussed the various Components of Feedback, Types of Feedback, Purpose of feedback and Feedback and Evaluation.

MADURAI - 625009

Dr Dhaval talked about the validity and reliability of the assessment tools for any given competence and emphasized the need for standardized assessment in medical education. He suggested to organise the workshop to train faculty members in assessment process. Dr Dhaval told that assessment in any medical education setting should reflect the educational objectives of the program and should be based on appropriate sampling of the program learning outcomes. A focus should be to provide high-quality formative assessment, through regular feedback. Assessment strategies should include direct observation of core clinical skills, behaviours, and the professional domains of practice. There should be a feasible assessment plan with a workload requirement that can be reasonably met by students and trainees.

A topic on Fostering a quality culture was discussed by Dr. Deiveegan. He highlighted the importance of Internal quality assurance cell (IQAC) as one of the core support systems on which teachers from medical colleges rely to ensure the quality of their educational processes. Through IQAC they can demonstrate that they are having control on their educational quality at par with the standards of accrediting bodies and can continuously improve and enhance their educational programmes.

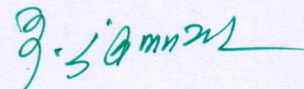

Finally, Dr John Spoke about Governance and Evaluation. He said that medical education program should make explicit the committee structures governing the activities of the program and this should include appropriate representation from students or trainees. Governance needs to reflect the educational missions and objectives of the program and should ensure autonomy and control over the decision making including the program's overall strategic direction and budget allocation. The responsibilities of the academic leadership of the program should be made clear. Program Evaluation should be transparent and address the content and context of the curriculum and the outcome of the program. Accreditation teams will be keen to see that feedback about the program is used to inform subsequent development and design.

A workshop on Innovative Teaching Learning Strategies in Medical Education Report

Date: 06-07-2017

Time: 8am-4pm

The first session was on introduction to innovative teaching learning strategies. Under this topic Dr Samir Bele HOD of Community Medicine Department VMCH&RI talked briefly about theories of learning where he enumerated the categories of intellectual skills. He also briefed upon the approaches to learning. He also enumerated that effective teaching to be a main concentrating point and increasing it through sharpening the skills was an important milestone towards the goal.

Problem-based learning (PBL), Under this topic Dr Trupti Bodhare clearly spoke about the clinical relevance, small-group interactions, and active learning methods that is given by the PBL curricular alternatives. She also talked about the potential issues and the role of the faculty in maintaining a successful design of PBL. She also briefed upon the Maastricht seven-jump process as the methodology in PBL.

Dr Dhaval briefed upon the topic of flipped classroom and generally talked about the "pedagogy-first" approach of teaching method. He briefed on the methodology by introducing the materials outside the classroom, which in class time is re-purposed for inquiry, application, and assessment. He mentioned about the main disadvantage as it requires reliance to technology and have resistance to change. He concluded the topic by saying it is an instructional strategy and a type of blended learning.

Dr. Jeyashree talked about simulation-based learning and explained that it is a training session in a virtual environment that mimics the real world activates and scenarios. She also mentioned that in medicine it offers great advantages to clinicians by giving the most realistic hands-on experience. She concluded the topic by saying that it provides opportunities to offer support and guidance to upcoming learners but have a disadvantage of maintenance and costly.

VELAMMAL MEDICAL COLLEGE HOSPITAL AND RESEARCH INSTITUTE MADURAI - 625009

Dr Dhaval opened the topic by saying that self-directed learning is a very different method of teaching, and it mainly depends on the students where the he/she takes initiative for learning by themselves and it includes activities such as selecting, managing and assessing their own learning activities. He also threw light by saying that teachers must help the student by providing the advice, direction, and resources to support the students while peers provide collaboration.

Dr Trupti Bodhare enumerated Community Based learning by explaining that it is an organizations program to promote learning and social development work. She added by saying the methodology as including individuals and groups in various activities in communities using a range of formal and informal methods. She also briefly explained about the Wisconsin model of Community Education and added on to the fact that it helps in providing process framework.

Dr Saranya talked about Small group discussion and the methodology of conducting this by having proper interaction among small group and the process should include dynamic, spontaneous and continues with each participant playing active roles. She also added to the topic that it may have some disadvantages in a larger group of people due to the difficulty in organizing such a meeting.

Dr. Deiveegan talked about the Interprofessional learning. He enumerated that when two or more professions learn with, from and about each other to improve collaboration and the quality of care is the heart of interprofessional learning. He also added on to that by saying that it greatly depends upon the relationship and the communicative skills between the different types of professions. He specified that the main disadvantage is the tremendous effort required to project an agenda with many professions involved and making it a feasible one for all.

The session concluded with valedictory function and vote of thanks.

Dear Friends,

It is a pleasure to invite you for the Velammal Shoulder Conference for Arthroscopy and Arthroplasty. The conference aims to clarify all doubts we come across in diagnosing and formulating management plan for shoulder conditions. For an aspiring trainee this will form a feast to understand the practical aspects of shoulder conditions. Decision making for surgical or conservative management, counselling the patients and common MRI diagnosis will be discussed. Live surgeries are planned and Bone model workshops for shoulder arthroscopy and arthroplasty will entertain enough. Renowned in the field are invited as faculty. The international faculty Dr. Angelo Diguinta from Italy and Dr. Sham Osman from South Africa have enormous experience in the field and will join us to share their knowledge. Interesting case scenarios that we come across in day to day practice will be put forth for the panel discussion and the evidence based view of the faculty will be shared. We welcome you to join the conference. The registration for conference is nominal. The workshop will teach on arthroscopic bankart repair/rotator cuff repair, Total shoulder and Reverse shoulder replacement. I hope this meeting will give a rewarding experience for the delegates and faculty.

Shoulder Arthroscopy

Time	Schedule
8:00-8:20	Registration
8:20-8:30	Prayer and welcome address
SESSION 1	
8:30-8:45	Diagnosing shoulder pathology - Made simple
8:45-9:00	Decide which surgery to do - Bankart/Remplissage/Latarjet
9.00 -9.15	Shoulder arthroscopy - Steps for Short learning curve
9.15 -9.30	Recorded Live Surgery - Tips and tricks in Bankart
9:30-10:30	Live Surgery 1 Arthroscopic Bankart Repair
10:30-11:00	Shoulder Instability - Case Based Discussion X 3 cases
11:00-11:30	Inaugural Function
11:30-11:45	Tea Break
SESSION 2	
11:45-12:00	Does all cuff tear need surgery?
12.00-12.30	Partial Tear of Rotator Cuff - Case Discussion
12.30-12.45	Recorded Live Surgery - Rotator cuff repair
12.45-14:00	Live Surgery 2 Arthroscopic Rotator Cuff Repair
14:00-14:30	Lunch
SESSION 3	
14:30-14.45	Rehab of Impingement Syndrome - What is done and what should be done
14:45-15:00	Cuff Tear And Adhesive Capsulitis - Case Discussion
15:00-15:10	Your read your MRI - Radiologist Perspective
15:10-15.20	Your read your MRI - Surgeons Perspective
15:20-16:30	Live Surgery 2 Live Surgery 3 Rotator Cuff Tear
16:30	Full Thickness Tear - Management
16:30-17:00	Algorithm Case discussion - Conservative to Reverse Shoulder Replacement
17:00-17:30	Failed Shoulder case - Case Discussion
17:30	Vote of Thanks
19:30	Dinner at Hotel Fortune Pandiyan, Madurai

23rd July

Theme

Shoulder Arthroplasty

Time	Schedule
7:45 am	Breakfast
8:00-8:20	Registration
8:20-8:30	Prayer and welcome address
SESSION 1	
8:30-8:45	How I choose type of surgery - TSA / Reverse TSA / Resurfacing
8:45-9:00	TSA / TSA Reverse / Bio Mechanics, Surgical steps, Outcome
9:00-9:15	Resurfacing Arthroplasty - Current trend
9:15-9:30	Proximal humerus fractures and shoulder replacement
SESSION 2	
9:30-10:00	Case based Panel discussion - Proximal humerus fractures cases for Replacement / Fixation
10.00 –10.15	Greater tuberosity fractures - Changing trend in management
10:15 - 10.30	Case Based Panel discussion - Arthritis and Cuff arthropathy
10:30-10:45	Tea Break
10:45-12:45	Live surgery - Total shoulder replacement
12:45-13:30	Lunch
SESSION 3	
13:30-13:45	Complications of Total and Reverse shoulder replacement
13:45-14:00	Managing failed shoulder replacement
14:00-16:00	Live surgery - Reverse shoulder
16:00-16:30	Case Based Panel Discussion - Failed Shoulder Cases
16:30-16:45	Vote of thanks

Experience of Fellows...

Dr. Bharath MBBS., DNB (Ortho)
Jan 1st 2016 to Jan 31st 2016

The visiting fellowship at Cardiff and Vale University was an icing in the cake after a fellowship under Dr. K.N. Subramanian which formed a strong foundation on which further knowledge and experience could be added. The wide variety of cases gives adequate exposure to the different techniques that can be adopted in daily practice. With the consultants being generous in sharing their expertise areas, the shortcuts that can be used and the hardships during their practice, makes it great learning experience.

Dr. Balaraju MBBS., MS (Ortho)
May 1st 2016 to May 31st 2016

I am really fortunate to have selected for one of the most coveted United Kingdom Visiting Fellowship offered through Dr. K.N. Subramanian in collaboration with Dr. Angus Robertson of Cardiff University. I had experience of assisting various complex knee and shoulder arthroscopy surgery. The hospital is attached to Cardiff University and consists of more than 30 Orthopaedic surgeons and hence also had chances to assist Primary and Revision arthroplasty cases. It is pleasurable and an immensely wonderful learning experience. While doing this visiting fellowship, I also applied for paid fellowship in London and feel happy to say that I got selected for another fellowship in London to start from September 2016

Dr. Balasugumar MBBS., MS (Ortho)
Jan 2016 to August 2016

It is 10 months since I finished fellowship with my Chief Dr. K.N. Subramanian, I learned a lot with him in Arthroscopic shoulder and knee surgery. It was also a wonderful learning experience in Cardiff. The fellowship was designed such a way that there is clear targeted achievement from month by month and finally getting experience from UK also. It is a turning point in my career, he also guided me through to start my Arthroscopy practice at my home town. I believe that this fellowship has not only taught Arthroscopy but has also given Self confidence, a new profile for doing hard work and getting right attitude.

Experience of Fellows...

Dr. Smarth Arya
MBBS., MS (Ortho), DNB (Ortho), MNAMS
Nov 1st 2016 to Dec 12th 2016

I feel really blessed and fortunate to have a teacher, mentor and a guide like Dr. K. N. Subramanian Sir right from the start of my Orthopaedic career. I am really grateful to him for selecting me for the clinical fellowship programme at Llandough University Hospital which is attached to the Cardiff and Vale University, UK. Dr. Angus Robertson and his team were really generous in guiding and teaching me different techniques, shortcuts in arthroscopic surgeries of shoulder and knee. I also got good exposure in shoulder and Elbow arthroplasty. It was a wonderful learning experience and is helping me immensely in my daily practice.

Dr. Girishkumar MBBS., MS (Ortho)
Jul 1st 2016 to Dec 31st 2016

I am extremely benefited from the fellowship under Dr. K.N. Subramanian. This fellowship was a comprehensive experience that provided excellent exposure to different cases in Arthroscopy and Sports Medicine. Dr. K.N. Subramanian showed enormously patience in teaching me from basics of Arthroscopy to advance techniques. International fellowship at UK was dream come true with exposure as an observer and had close working relationship with best renowned shoulder and knee surgeons. Totally it was wonderful opportunity to gain experience in the most up-to-date techniques in Arthroscopy and sports medicine.

Dr. Amit Handa MBBS., MS (Ortho)
Jan 1st 2017 to Jul 31st 2017

I hail from Delhi. Presently I am about to finish my 6months fellowship with Dr. K.N. Subramanian. These 6 months had been a wonderful period for me with Dr. K.N. Subramanian. This fellowship gave me a enough exposure, hands on and tricks in managing the simple and complex shoulder and knee arthroscopy surgeries. Other than arthroscopy I also got a wide experience in hip and knee arthroplasty. Now in July I'm leaving to Cardiff, UK for 6 weeks of visiting fellowship in Arthroscopy to Cardiff and vale university health board.
