Report on Certificate Course: Leadership Skills in Medicine

On 13 April 2024, a comprehensive certificate course on Leadership Skills in Medicine was conducted for third-year MBBS students(2021- 2022 batch). The program commenced at 08:00 AM with an engaging introduction to leadership in medicine led by Dr. Samir, who set the tone for the day. This was followed by Dr. Sudhir's session on various leadership styles, providing valuable insights into effective approaches within the medical field.

At 09:30 AM, Dr. Alamelu focused on communication skills essential for leaders, emphasizing the importance of clear and empathetic interaction in healthcare. Dr. Balakumaran then led a discussion on team dynamics and collaboration, highlighting the significance of teamwork in delivering quality patient care.

Post-lunch, Dr. Santha Sheela Kumari addressed ethical leadership in medicine, followed by Dr. Samir's session on mentorship and coaching, underlining the pivotal role of guidance in professional development. The afternoon sessions resumed with Dr. Alamelu discussing leading change in healthcare, equipping students with strategies for effective implementation of new practices.

Dr. Sudhir's presentation on building resilience and emotional intelligence prepared students to navigate the challenges of the medical profession. After a brief break, Dr. Balakumaran tackled leadership in crisis management, an essential topic in today's fast-paced healthcare environment. The day concluded with Dr. Santha Sheela Kumari guiding students in creating personal leadership development plans, ensuring they left with actionable insights for their future careers.

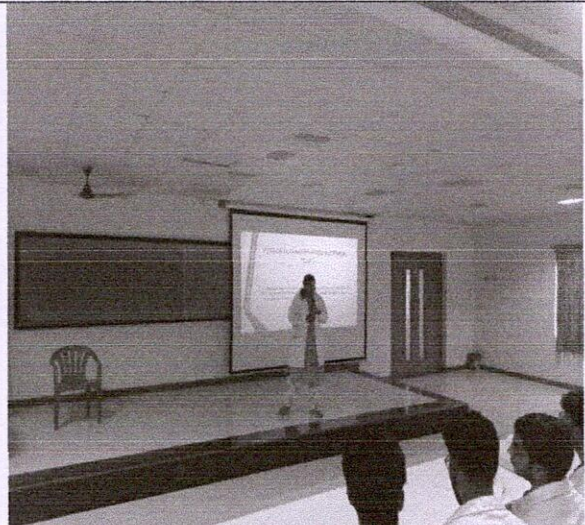

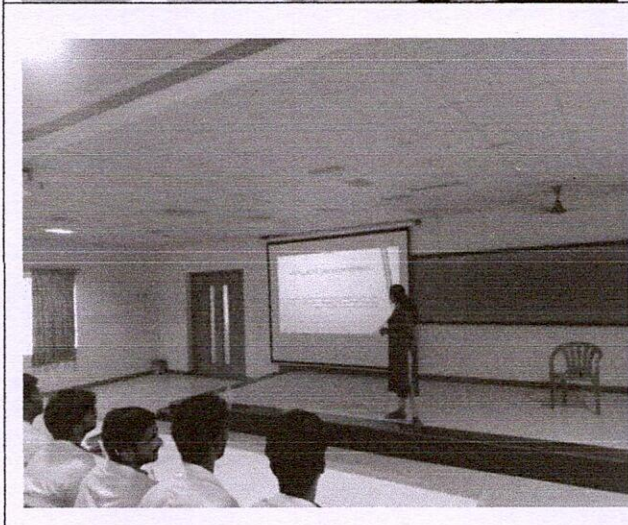

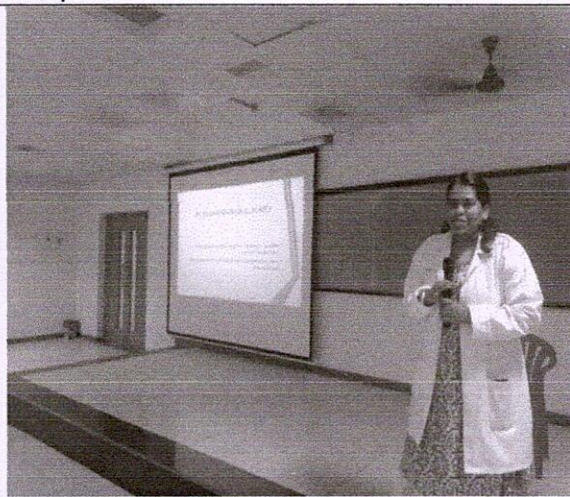

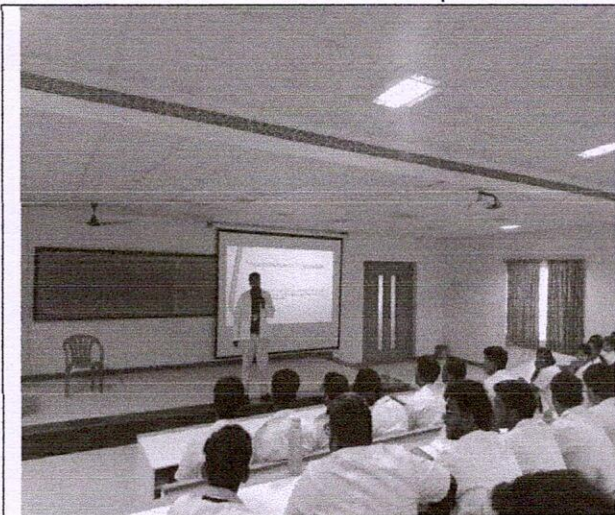

The course wrapped up with closing remarks and a Q&A session, fostering an environment of learning and curiosity. Overall, the event was a significant step in developing essential leadership skills among future medical professionals.

Department of Pharmacology

Date: 1.2.24

Subject: Announcement of Certificate Course on "Drug Development and Approval Process" for Second-Year MBBS Students

We are pleased to announce that the Department of Pharmacology, VMCH&RI, will be conducting a one-day certificate course on "**Drug Development and Approval Process**" exclusively for second-year MBBS students. This course is designed to go beyond the standard curriculum and provide in-depth knowledge of the various stages involved in drug development, regulatory approval, and post-marketing surveillance.

Program Details:

- **Date:** 10.2.24 **Time:** 8:00 AM to 5:00 PM
- **Venue:** Demo hall, Department of Pharmacology
- **Organized by:** Department of Pharmacology, VMCH&RI

Program Highlights:

- **Introduction to Drug Development**
- **Preclinical Studies**
- **Phases of Clinical Trials**
- **Serious Adverse Event Reporting**
- **Regulatory Approval Process**
- **Case Study Discussion on Recent Drug Approvals**
- **Post-Marketing Surveillance and Pharmacovigilance**
- **Ethical and Legal Aspects in Drug Development**
- **Interactive Workshop on Designing a Hypothetical Drug Trial**

Speakers:

Sessions will be led by experienced faculty members.

Registration:

Interested students are requested to register by [Insert Registration Deadline, e.g., Date and Time] at the Department of Pharmacology. Limited seats are available on a first-come, first-served basis.

Certificate of Participation will be provided to all attendees.

Programme report-Certificate Course on "Drug development and approval process"

Date: 10.2.24

Venue: VMCH&RI, Madurai

Organized by: Department of Pharmacology, VMCH&RI

Target Audience: Second-year MBBS students

Introduction

The Department of Pharmacology at VMCH&RI organized a one-day certificate course on "Drug Development and Approval Process" to provide second-year MBBS students with an in-depth understanding of drug development, regulatory approval, and post-marketing processes. The program was designed to supplement the students' pharmacology curriculum and enhance their knowledge of critical processes involved in bringing new drugs to market.

Program Objectives

1. To introduce students to the fundamental stages of drug development and clinical trials.
2. To familiarize students with preclinical and clinical trial requirements.
3. To discuss the regulatory and ethical considerations in drug development.
4. To highlight the importance of pharmacovigilance and post-marketing surveillance.
5. To engage students through case studies and interactive workshops.

Session Summaries

1. Welcome and Introduction

Dr. Raj Kishore Mahato opened the session by welcoming the students and introducing the objectives of the course. He highlighted the importance of understanding the drug development process, given the complexity and regulatory requirements in modern pharmacology.

2. Introduction to Drug Development

Dr. Muthu Meera provided an overview of drug discovery, including target identification, lead compound optimization, and early development stages. She discussed the initial hurdles and considerations in selecting potential drug candidates.

3. Preclinical Studies

Dr. Susila presented an in-depth analysis of preclinical studies, focusing on in vitro and in vivo testing, toxicity studies, and pharmacokinetics. The session provided students with insights into how preclinical research helps ensure drug safety before human trials.

4. Phases of Clinical Trials

Dr. Anitha explained the four phases of clinical trials, highlighting the objectives, methodologies, and significance of each phase. She emphasized the ethical considerations and safeguards to protect participants during clinical research.

5. Serious Adverse Event Reporting

Dr. Muthu Meera returned to discuss serious adverse event (SAE) reporting, emphasizing the role of pharmacovigilance, ethics committees, and regulatory requirements in managing adverse events during clinical trials.

6. Regulatory Approval Process

Dr. Raj Kishore Mahato provided an overview of the regulatory landscape, discussing the role of various regulatory agencies like the FDA, EMA, and DCGI. He covered the drug approval process and the criteria these agencies use to evaluate safety and efficacy.

7. Case Study Discussion: Recent Drug Approvals

In this session, Dr. Muthu Meera led a case study on recent drug approvals, analyzing successful drug applications and the factors that contributed to their approval. This session allowed students to apply theoretical knowledge to real-world examples.

8. Post-Marketing Surveillance and Pharmacovigilance

Dr. Susila highlighted the importance of post-marketing surveillance, the role of pharmacovigilance systems, and ongoing monitoring to detect rare adverse effects after a drug is marketed.

9. Ethical and Legal Aspects in Drug Development

Dr. Anitha discussed the ethical challenges and legal considerations in drug research, focusing on patient consent, confidentiality, and compliance with regulatory guidelines.

10. Interactive Workshop: Designing a Hypothetical Drug Trial

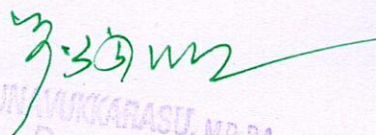

The final session was an interactive workshop where all faculty members engaged students in designing a hypothetical drug trial. Students worked in groups to set objectives, define endpoints, and address ethical considerations, enhancing their understanding of the clinical trial process.

Conclusion

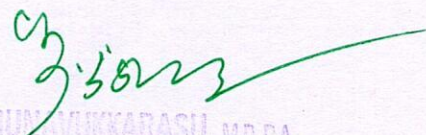

The certificate course was well-received, with students showing keen interest in the drug development process and the complexities of regulatory approval. The interactive format and case study discussions provided practical insights, while the workshop encouraged active participation and critical thinking. Feedback indicated that the course was highly beneficial, with students requesting more such modules in advanced pharmacology topics.
