

## Parent Teacher Meetings

The Department of Physiology views the academic performance of all the students under their care with utmost importance. Poor performance by students in their internal assessments and central exams is taken seriously.

The list of students who perform below average in the central exams is compiled and handed over to the Administrative Office. The parents of these poor-performing students are intimated by them. The parents at their convenient time are requested to visit the department and meet the HOD to discuss their ward's academic performance.

During this interaction between the parents and HOD, the performance, attitude, and demeanor of the student during lectures and practicals are discussed. The parents are guided on the various measures available to the students for improving their academic performance such as remedial evening classes, assignments and retests provided by the department. The parents are oriented to the mentor-mentee system and the students are advised to meet with their Mentors often to discuss the difficulties that the student may be facing. At the end of the meeting, the parent reiterated the importance of academics for being a good doctor. The academic performance of these students is closely monitored and all possible help from the department is provided. After the next assessment by the department, the student's performance is evaluated. As a pattern, it has been found that most of the students usually improve after their first parent-teacher meeting. The parents of those students who struggle to perform well even after their first meeting are requested to be present for a second meeting to discuss further measures to help their ward. These interactions are repeated till the student is successful in the assessment conducted by the department.
