## Detailed Program Report for Collaborative Activity

2023-24

**Title of the program:** Training program at Leprosy hospital

**Dates:** June 2023 to May 2024

**Place:** The Leprosy Mission (TLM) Hospital Dhayapuram.

**Report:** The Department of Community Medicine in collaboration with The Leprosy Mission organized training programs for the batch of 2018-19 MBBS students who were doing their internship at that time. The TLM operates a secondary hospital in Manamadurai that is focused on the treatment & rehabilitation of Leprosy patients. The students were divided into groups of 3 -5 and were sent for 5 to 7 days of training. During the academic year of 2023-24 more than 150 interns in around 50 groups attended the training program.

The training allowed the interns to learn about working at a secondary hospital. They had the opportunity to treat Leprosy patients, both old and new, and were able to see many leprosy cases with long-term disability undergoing various forms of rehabilitation. In addition, patients with minor problems & many other skin diseases also attended the outpatient department and thus the training provided exposure to working in different settings and seeing a variety of patients.

#### DETAILED PROGRAM REPORT FOR COLLABORATIVE ACTIVITY

2023-24

**TITLE OF THE PROGRAM: Visit to places of public health importance (water & sanitation)**

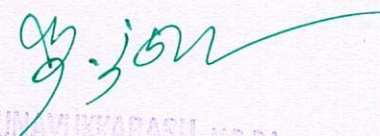

The department of community medicine in collaboration with the corporation of Madurai organized visits to places of public health importance related to water & sanitation for 2<sup>nd</sup> year MBBS students. These include the water treatment plant at Manaloor, The Sewage Treatment Plant at Avaniyapuram, and the Solid Waste Management area at Vellaikal.

During the academic year of 2023-24, students from 2 different MBBS batches visited in smaller groups between June 2023 to May 2024, and each of these visiting groups was accompanied by a faculty member of the department. The visits introduced the students to processes involved in ensuring clean water and better waste management in the city.

Visit to the water treatment plant at Manaloor involved the collection of water from the Vaigai river, followed by purification through various processes like filtration, aeration, chlorination etc., before being pumped out for public distribution.

Visit to the sewage treatment plant at Avaniyapuram gave the students an opportunity to observe the process by which sewage that contains harmful material is made harmless before being sent out for irrigation. It involves both primary treatment & secondary treatment followed by chlorination.

During the visit to the solid waste management unit, the students were able to observe the process of sorting the waste into recyclable and non-recyclable waste. The non-recyclable waste is subjected to further processes. It involves filtering through a series of filters with progressively smaller sizes and biodegradation in between. The filtered-out part is sent to a nearby landfill while the biodegraded waste comes out as fertilizer.
