

Guest Lecture

Date - 11.11.2024, 10.00 AM to 11.00 AM

Topic – Membrane Potential & Galvanometer

Speaker – Dr. Prem Balaguru, Associate Professor, Department of Physiology, Government Medical College, Ramnathapuram

As part of General Physiology curriculum a Guest lecture was organized to emphasize the importance of Membrane potential. Dr. Prem Balaguru from the Department of Physiology, GMC Ramnathapuram gave an information rich lecture on the topic. He took the students on a journey through the diverse history of various experiments conducted by Doyens in Physiology. With simple diagrams he made the students understand the concepts of membrane potential, how it is generated, etc.

The students attended the lecture attentively and many students clarified their doubts with Dr. Prem at the end of the session.

The session started with Welcome address by Dr. S. Anu, HOD and Vote of thanks was delivered by Dr. Noel Naveen Johnson, Assistant Professor.

Department of Physiology,
Velammal Medical College Hospital & Research Institute, Madurai
